

WISCONSERVATION
FEBRUARY 2008 REPORT

The research of potential articles – topics for Wisconservation is a continuous Project – the interacting with many governmental agencies the primary source of information, Via the Internet.

The protocol between the Federation and Ripon Community Printers is working Well, as is the file maintenance of the circulation file. We currently maintain two complete circulation files off premise – off-site from Mac Kenzie.

The deadline for submitting of articles, club events remains the 15th of the month. Please keep this date in mind when contemplating advertising affiliate club fund raising events etc.

FYI - On the economic front, research was conducted during budget preparation time to evaluate our current membership communication and alternatives. Such as, a smaller “size” publication, U.S. Postal Service mailing options. Ripon Community Printers and the Postal Service have indicated the current Wisconservation printing/distribution is the most economical and effective method of fulfilling our communication intentions. Of course, going “paperless” is the most economical - No printing costs – No mailing costs! However, inserting WISCONSERVAION on the Web Page is somewhat presumptuous. That is, that all or a majority of the membership, has access to a computer.

And don't forget! “Tell people you rear it in WISCONSERVATION”!

Respectfully Submitted
